NON-GAAP PERFORMANCE MEASURES

The Company presents the non-GAAP performance measures set forth below. These measures should not be considered as alternatives to, or more meaningful than, net income (calculated in accordance with GAAP) or other GAAP financial measures, as an indicator of financial performance and are not alternatives to, or more meaningful than, cash flow from operating activities (calculated in accordance with GAAP) as a measure of liquidity. Non-GAAP performance measures have limitations as they do not include all items of income and expense that affect operations, and accordingly, should always be considered as supplemental financial results to those calculated in accordance with GAAP. The Company's computation of these non-GAAP performance measures may differ in certain respects from the methodology utilized by other REITs and, therefore, may not be comparable to similarly titled measures presented by such other REITs. Investors are cautioned that items excluded from these non-GAAP performance measures are relevant to understanding and addressing financial performance. A reconciliation of these non-GAAP performance measures to net income is presented in the attached table.

NAREIT FFO

NAREIT FFO is a supplemental, non-GAAP performance measure utilized to evaluate the operating and financial performance of real estate companies. The National Association of Real Estate Investment Trusts ("NAREIT") defines FFO as net income (loss), calculated in accordance with GAAP, excluding (i) depreciation and amortization related to real estate, (ii) gains and losses from the sale of certain real estate assets, (iii) gains and losses from change in control, (iv) impairment write-downs of certain real estate assets and investments in entities when the impairment is directly attributable to decreases in the value of depreciable real estate held by the entity and (v) after adjustments for unconsolidated joint ventures calculated to reflect FFO on the same basis. Considering the nature of its business as a real estate owner and operator, the Company believes that NAREIT FFO is useful to investors in measuring its operating and financial performance because the definition excludes items included in net income that do not relate to or are not indicative of the Company's operating and financial performance, such as depreciation and amortization related to real estate, and items which can make periodic and peer analyses of operating and financial performance more difficult, such as gains and losses from the sale of certain real estate assets and impairment write-downs of certain real estate assets.

Same Property NOI

Same property NOI is a supplemental, non-GAAP performance measure utilized to evaluate the operating performance of real estate companies. Same property NOI is calculated (using properties owned for the entirety of both periods and excluding properties under development and completed new development properties which have been stabilized for less than one year) as total property revenues (base rent, expense reimbursements, adjustments for revenues deemed uncollectible, ancillary and other rental income, percentage rents and other revenues) less direct property operating expenses (operating costs and real estate taxes). Same property NOI excludes (i) corporate level expenses (including general and administrative), (ii) lease termination fees, (iii) straight-line rental income, net, (iv) accretion of above- and below-market leases and tenant inducements, net, (v) straight-line ground rent expense, and (vi) income / expense associated with the Company's captive insurance company. Considering the nature of its business as a real estate owner and operator, the Company believes that same property NOI is useful to investors in measuring the operating performance of its property portfolio because the definition excludes various items included in net income that do not relate to, or are not indicative of, the operating performance of the Company's properties, such as depreciation and amortization and corporate level expenses (including general and administrative), and because it eliminates disparities in NOI due to the acquisition or disposition of properties or the stabilization of completed new development properties during the period presented and therefore provides a more consistent metric for comparing the operating performance of the Company's real estate between periods.

Rent Spread	Represents the percentage change in contractual ABR PSF in the first year of the new lease relative to contractual ABR PSF in the last year of the old lease. Rent spreads are presented only for leases deemed comparable. For purposes of calculating rent spreads, ABR PSF includes the GLA of lessee-owned leasehold improvements.
New Rent Spread	Includes new leases signed on units that were occupied within the prior 12 months. New leases signed on units that have been vacant for longer than 12 months and new leases signed on first generation space are non-comparable and excluded from New Rent Spreads.
Renewal Rent Spread	Includes renewal leases signed with the same tenant in all or a portion of the same location or that include the expansion into space that was occupied within the prior 12 months. Renewals that include the expansion of an existing tenant into space that has been vacant for longer than 12 months are non-comparable and excluded from Renewal Rent Spreads.
Option Rent Spread	Includes contractual renewal options exercised by tenants in the same location to extend the term of an expiring lease.
Total Rent Spread	Combined spreads for new, renewal and option leases.

Same Property NOI

A supplemental, non-GAAP performance measure. Please see below for more information on the limitations of non-GAAP performance measures. A reconciliation of Same Property NOI to net income is provided on page 13. Represents NOI of properties owned for the entirety of both periods and excluding properties under development and completed New Development properties which have been stabilized for less than one year. Same Property NOI excludes income or expense associated with the Company's captive insurance company.

Small Shop Spaces

Spaces less than 10,000 SF of GLA.

Straight-line Rent

Non-cash revenue related to GAAP requirement to average a tenant's contractual base rent over the life of the lease. The cumulative difference between rental revenue recognized and contractual payment terms is recognized as deferred rent and included in Receivables, net. The Company periodically evaluates the collectability of its receivables related to straight-line rent. Any receivables that are deemed to be uncollectible are recognized as a reduction to straight-line rental income, net.

Year Built

Year of most recent redevelopment or year built if no redevelopment has occurred.

COVID-19

The Company expects the economic impact of the novel strain of coronavirus ("COVID-19") to continue to adversely impact operating results for 2021. Portfolio data presented in the Supplemental Disclosure for the quarter ended December 31, 2020 reflects the contractual obligations of tenants. Due to COVID-19, there is inherent uncertainty as it relates to the Company's reinvestment projects, specifically with respect to expected project scopes, expected stabilization dates and expected NOI yields. For additional information refer to Form 10-K, filed with the Securities and Exchange Commission ("SEC") on February 11, 2021.

Non-GAAP Performance Measures

The Company presents the non-GAAP performance measures set forth below. These measures should not be considered as alternatives to, or more meaningful than, net income (calculated in accordance with GAAP) or other GAAP financial measures, as an indicator of financial performance and are not alternatives to, or more meaningful than, cash flow from operating activities (calculated in accordance with GAAP) as a measure of liquidity. Non-GAAP performance measures have limitations as they do not include all items of income and expense that affect operations, and accordingly, should always be considered as supplemental financial results to those calculated in accordance with GAAP. The Company's computation of these non-GAAP performance measures may differ in certain respects from the methodology utilized by other REITs and, therefore, may not be comparable to similarly titled measures presented by such other REITs. Investors are cautioned that items excluded from these non-GAAP performance measures are relevant to understanding and addressing financial performance.

The Company believes that the non-GAAP performance measures it presents are useful to investors for the following reasons:

- **EBITDA, EBITDAre, Adjusted EBITDA & Cash Adjusted EBITDA**
Considering the nature of its business as a real estate owner and operator, the Company believes that EBITDA is useful to investors in measuring its operating performance because the definition excludes items included in net income that do not relate to or are not indicative of the operating performance of the Company's real estate, such as interest expense, federal and state taxes, and depreciation and amortization. The Company believes EBITDAre is also useful to investors as it further eliminates disparities in EBITDA due to gains and losses from the sale of certain real estate assets and impairment write-downs of certain real estate assets during the period presented and therefore provides a more consistent metric for comparing the operating performance of the Company's real estate between periods. The Company believes Adjusted EBITDA, which further eliminates disparities in EBITDAre due to gains and losses on extinguishment of debt and other items that the Company believes are not indicative of the Company's operating performance, and Cash Adjusted EBITDA, which further eliminates straight-line rental income, net, accretion of above- and below-market leases and tenant inducements, net, and straight-line ground rent expense, are also useful to investors in understanding the Company's operating performance.
- **NAREIT FFO**
Considering the nature of its business as a real estate owner and operator, the Company believes that NAREIT FFO is useful to investors in measuring its operating and financial performance because the definition excludes items included in net income that do not relate to or are not indicative of the Company's operating and financial performance, such as depreciation and amortization related to real estate, and items which can make periodic and peer analyses of operating and financial performance more difficult, such as gains and losses from the sale of certain real estate assets and impairment write-downs of certain real estate assets.
- **NOI and Same Property NOI**
Considering the nature of its business as a real estate owner and operator, the Company believes that NOI is useful to investors in measuring the operating performance of its property portfolio because the definition excludes various items included in net income that do not relate to, or are not indicative of, the operating performance of the Company's properties, such as depreciation and amortization and corporate level expenses (including general and administrative). The Company believes Same Property NOI is also useful to investors as it further eliminates disparities in NOI due to the acquisition or disposition of properties or the stabilization of completed New Development properties during the period presented and therefore provides a more consistent metric for comparing the operating performance of the Company's real estate between periods.
