NON-GAAP PERFORMANCE MEASURES

The Company presents the non-GAAP performance measures set forth below. These measures should not be considered as alternatives to, or more meaningful than, net income (calculated in accordance with GAAP) or other GAAP financial measures, as an indicator of financial performance and are not alternatives to, or more meaningful than, cash flow from operating activities (calculated in accordance with GAAP) as a measure of liquidity. Non-GAAP performance measures have limitations as they do not include all items of income and expense that affect operations, and accordingly, should always be considered as supplemental financial results to those calculated in accordance with GAAP. The Company's computation of these non-GAAP performance measures may differ in certain respects from the methodology utilized by other REITs and, therefore, may not be comparable to similarly titled measures presented by such other REITs. Investors are cautioned that items excluded from these non-GAAP performance measures are relevant to understanding and addressing financial performance. A reconciliation of net income to these non-GAAP performance measures is presented in the attached tables.

Nareit FFO

Nareit FFO is a supplemental, non-GAAP performance measure utilized to evaluate the operating and financial performance of real estate companies. Nareit defines FFO as net income (loss), calculated in accordance with GAAP, excluding (i) depreciation and amortization related to real estate, (ii) gains and losses from the sale of certain real estate assets, (iii) gains and losses from change in control, (iv) impairment write-downs of certain real estate assets and investments in entities when the impairment is directly attributable to decreases in the value of depreciable real estate held by the entity and (v) after adjustments for unconsolidated joint ventures calculated to reflect FFO on the same basis. Considering the nature of its business as a real estate owner and operator, the Company believes that Nareit FFO is useful to investors in measuring its operating and financial performance because the definition excludes items included in net income that do not relate to or are not indicative of the Company's operating and financial performance, such as depreciation and amortization related to real estate, and items which can make periodic and peer analyses of operating and financial performance more difficult, such as gains and losses from the sale of certain real estate assets and impairment write-downs of certain real estate assets.

Same Property NOI

Same property NOI is a supplemental, non-GAAP performance measure utilized to evaluate the operating performance of real estate companies. Same property NOI is calculated (using properties owned for the entirety of both periods and excluding properties under development and completed new development properties that have been stabilized for less than one year) as total property revenues (base rent, expense reimbursements, adjustments for revenues deemed uncollectible, ancillary and other rental income, percentage rents, and other revenues) less direct property operating expenses (operating costs and real estate taxes). Same property NOI excludes (i) lease termination fees, (ii) straight-line rental income, net, (iii) accretion of below-market leases, net of amortization of above-market leases and tenant inducements, (iv) straight-line ground rent expense, net, (v) income or expense associated with the Company's captive insurance company, (vi) depreciation and amortization, (vii) impairment of real estate assets, (viii) general and administrative expense, and (ix) other income and

450 Lexington Avenue : New York, NY 10017 : 800.468.7526

expense (including interest expense and gain on sale of real estate assets). Considering the nature of its business as a real estate owner and operator, the Company believes that NOI is useful to investors in measuring the operating performance of its portfolio because the definition excludes various items included in net income that do not relate to, or are not indicative of, the operating performance of the Company's properties, such as lease termination fees, straight-line rental income, net, income or expense associated with the Company's captive insurance company, accretion of below-market leases, net of amortization of above-market leases and tenant inducements, straight-line ground rent expense, net, depreciation and amortization, impairment of real estate assets, general and administrative expense, and other income and expense (including interest expense and gain on sale of real estate assets). The Company believes that same property NOI is also useful to investors because it further eliminates disparities in NOI by only including NOI of properties owned for the entirety of both periods presented and excluding properties under development and completed new development properties that have been stabilized for less than one year and therefore provides a more consistent metric for comparing the operating performance of the Company's real estate between periods.

Straight-line Rent	Non-cash revenue recognized related to the GAAP requirement to average a tenant's contractual base rent over the life of the lease. The Company commences recognizing rental revenue based on the date it makes the underlying asset available for use by the tenant. The cumulative difference between rental revenue recognized and contractual payment terms is recognized as deferred rent and included in Receivables, net on the Consolidated Balance Sheets. The Company periodically evaluates the collectability of its receivables related to straight-line rent. Any receivables that are deemed to be uncollectible are recognized as a reduction to straight-line rental income, net.
Year Built	Year of most recent redevelopment or year built if no redevelopment has occurred.

Non-GAAP Performance Measures

The Company presents the non-GAAP performance measures set forth below. These measures should not be considered as alternatives to, or more meaningful than, net income (calculated in accordance with GAAP) or other GAAP financial measures, as an indicator of financial performance and are not alternatives to, or more meaningful than, cash flow from operating activities (calculated in accordance with GAAP) as a measure of liquidity. Non-GAAP performance measures have limitations as they do not include all items of income and expense that affect operations, and accordingly, should always be considered as supplemental financial results to those calculated in accordance with GAAP. The Company's computation of these non-GAAP performance measures may differ in certain respects from the methodology utilized by other REITs and, therefore, may not be comparable to similarly titled measures presented by such other REITs. Investors are cautioned that items excluded from these non-GAAP performance measures are relevant to understanding and addressing financial performance.

The Company believes that the non-GAAP performance measures it presents are useful to investors for the following reasons:

- **EBITDA, EBITDAre, Adjusted EBITDA & Cash Adjusted EBITDA**
Considering the nature of its business as a real estate owner and operator, the Company believes that EBITDA, EBITDAre, Adjusted EBITDA, and Cash Adjusted EBITDA are useful to investors in measuring its operating performance because they exclude items included in net income that do not relate to or are not indicative of the operating performance of the Company's real estate. The Company believes EBITDA, EBITDAre, Adjusted EBITDA, and Cash Adjusted EBITDA are widely known and understood measures of performance, independent of a company's capital structure and items which can make periodic and peer analyses of performance more difficult, and that these metrics can provide investors with a more consistent basis by which to compare the Company with its peers.
- **Nareit FFO**
Considering the nature of its business as a real estate owner and operator, the Company believes that Nareit FFO is useful to investors in measuring its operating and financial performance because the definition excludes items included in net income that do not relate to or are not indicative of the Company's operating and financial performance, such as depreciation and amortization related to real estate, and items which can make periodic and peer analyses of operating and financial performance more difficult, such as gains and losses from the sale of certain real estate assets and impairment write-downs of certain real estate assets.
- **NOI and Same Property NOI**
Considering the nature of its business as a real estate owner and operator, the Company believes that NOI is useful to investors in measuring the operating performance of its portfolio because the definition excludes various items included in net income that do not relate to, or are not indicative of, the operating performance of the Company's properties, such as lease termination fees, straight-line rental income, net, accretion of below-market leases, net of amortization of above-market leases and tenant inducements, straight-line ground rent expense, net, income or expense associated with the Company's captive insurance company, depreciation and amortization, impairment of real estate assets, general and administrative expense, and other income and expense (including interest expense and gain on sale of real estate assets). The Company believes that Same Property NOI is also useful to investors because it further eliminates disparities in NOI by only including NOI of properties owned for the entirety of both periods presented and excluding properties under development and completed New Development properties that have been stabilized for less than one year and therefore provides a more consistent metric for comparing the operating performance of the Company's real estate between periods.
